

LYSSY & ECKEL FEEDS

DELIVERY SERVICES

PROTEIN FEEDER DELIVERIES

As a service to our deer protein customers, we now offer a protein feeder service out of our Hondo store. We will fill your feeders using a Bruton Easy-Feed Blower System.

No longer do you need to unload bags of feed into your storage shed just to reload, move, and lift them again in the process of filling your protein feeders. So take the backbreaking work out of protein feeding, enjoy your ranch or lease, and let Lyssy & Eckel give you your time back by filling your feeders for you.

BULK DELIVERIES

When delivering, our goal at Lyssy & Eckel is to minimize the fines generated while unloading feed. Therefore, all bulk deer pellets and cattle cubes manufactured by Lyssy & Eckel are delivered on paddlegon trailers. Paddlegon trailers utilize paddle conveyors to lift pellets and cubes into an overhead bin rather than "Pellet Grinding" augers. Deer pellets and shell corn are unloaded through our new "Cattle Cube Extractor".

Lyssy & Eckel paddlegons are the only trailers in the industry that collect fines TWICE during the unloading process. When you receive bulk pellets or cubes from Lyssy & Eckel, you can be assured fines will be kept to an absolute minimum.
