**LYSSY & ECKEL
FEEDS**

Today more than ever, cattlemen are demanding top performance from their animals. Since 1945, **Lyssy & Eckel** has worked to meet these demands.

All cattlemen are harvesters of grass and the key to maximum performance is what happens to this grass once it is consumed. The efficiency at which cattlemen market forages is directly related to the function of the rumen. As rumen efficiency improves, the animal is able to consume more forage, leading to greater utilization of existing forages and better production performance.

All **Lyssy & Eckel Feeds** are formulated to supply the necessary proteins, carbohydrates, minerals and vitamins necessary to stimulate rumen efficiency.

**A Tradition of Quality Feeds
