**Lyssy & Eckel Feeds**

Since 1945

**Texas' Most Researched Deer Feed**

**We have a unique  
way of marketing  
our products...**

**No Empty Promises...**

**No  
Unsubstantiated  
Claims...**

**JUST RESULTS...**

At Lyssy & Eckel we are serious about manufacturing deer feeds that will maximize your deer herd's genetic potential. Deer nutrition is a complex issue and our feeds are based on almost two decades of ongoing research. Since 1989, we have conducted research on the same South Texas deer herd. This research has proven the benefits of proper levels of calcium, phosphorus, zinc, copper, manganese and selenium. Our work has also focused on the performance of various sources of protein. Proteins perform differently and we have proven specific proteins are critical in the development of greater antler mass and tyne length. We utilize this research to continually develop feeds that produce RESULTS!

We have bulk and bagged distribution throughout Texas. Bagged or bulk we want to make delivering products to you as convenient as possible for you. Thanks again for your interest in Lyssy & Eckel deer feeds. If you would like additional information, please give us a call at 830-484-3314, or you can access our website at [www.lefeeds.com](http://www.lefeeds.com).

For free-ranging deer we recommend our 20% Deer Pellets or Wheeler 20/12, both of which are formulated to supplement the nutrition provided by the native browse available to the deer in the pasture.

### 20% DEER PELLETS FOR BREEDING AGE DEER ON OPEN RANGE

#### GUARANTEED ANALYSIS

Crude Protein, not less than	20.00%
Crude Fat, not less than	2.00%
Crude Fiber, not more than	12.00%
Calcium, not less than	1.60%
Calcium, not more than	1.90%
Phosphorus, not less than	1.10%
Salt, not less than	0.50%
Salt, not more than	0.70%
Potassium, not less than	1.00%
Zinc, not less than	500 PPM
Copper, not less than	100 PPM
Vitamin A, not less than	10,000 I.U./lb
Vitamin E, not less than	20 I.U./lb

For pen-raised deer, we recommend our Wheeler 17/17 Deer Pellets, which is formulated for deer having limited access to native browse.

### On Target Research Since 1989

Our ongoing On Target Research and testing has been conducted with the same deer herd since 1989. We are committed to developing deer feed products that will allow your deer to maximize their genetic potential for size and antler mass. Our On Target Research feed formulations are based on over 1,000 browse samples, analyzed for protein, minerals and trace minerals.

All Lyssy & Eckel Deer feeds utilize nine sources of proteins and elevated levels of copper, zinc, manganese, and selenium. To maximize protein utilization, our feeds are formulated to the proper balance of degradable and bypass proteins. Trace mineral absorption is enhanced by the use of sulfates and chelated trace minerals. Deer have a very rapid rate of nutrient passage, and as a result, all ingredients used in a deer feed must be of the highest quality. In all Lyssy & Eckel feeds, all ingredients are selected based on this need for rapid digestibility.

Based on our research findings our deer feeds change annually to maximize product performance. Changes are only made after field tests have determined that these changes will improve performance. We NEVER least-cost formulate and after we make our annual change we NEVER change or substitute ingredients. As a result, you can be assured each load you receive is the same as the last load.

### WHEELER 17/17/06 FOR BREEDING AGE DEER IN CONFINEMENT

#### GUARANTEED ANALYSIS

Crude Protein, not less than	17.00%
Crude Fat, not less than	2.50%
Crude Fiber, not more than	17.00%
Calcium, not less than	1.70%
Calcium, not more than	1.90%
Phosphorus, not less than	1.10%
Salt, not less than	0.50%
Salt, not more than	0.75%
Zinc, not less than	500 PPM
Copper, not less than	90 PPM
Vitamin A, not less than	10,000 I.U./lb.
Vitamin E, not less than	50 I.U./lb.

### ...ALL LYSSY & ECKEL DEER FEEDS FEATURE...

- Nine Sources of Vegetable Protein•
- Balanced Degradable-Bypass Protein Ratio•
- Multiple Complex Carbohydrate Sources•
- Chelated Zinc, Manganese, Copper and Cobalt•
- Minimal Levels of Corn • No Least Cost Formulating•
- High Phosphorus Bioavailability
- Research Driven Formulation Changes•
- Available Bulk or Bagged•
- AVAILABLE IN 5/32", 1/4"OR 3/8" PELLETS•
