

Lab Lab

Lab lab is an annual legume that is highly heat and drought tolerant and grows best in the southeast and across Texas. Ideal to plant in food plots with sorghum and millet or other grains. Lab lab provides high quality forages for deer with a high rate of forage material. Best planted on a prepared seedbed and at the rate of 10 lb. per acre with inoculated seed in rows 6-8 inches apart. Lab Lab will furnish heavy forage until the first frost.
