

Sungrazer Tetraploid Ryegrass

Description

SunGrazer Annual ryegrass is the highest yielding annual ryegrass available thru Pogue Agri Partners. Developed from specially selected annual ryegrass populations, SunGrazer has very fast establishment, allowing for earlier forage availability, while maintaining excellent forage yields throughout the grazing season. SunGrazer has good crown rust resistance, with high regrowth capabilities.

Trial Results

SunGrazer works well alone, or in combination with smallgrains and legumes. SunGrazer will yield tons of high quality forage, and in general, performs better in the humid Gulf Coast region. SunGrazer is the New Name for ryegrass in South Texas.
